

## MAKING MITE 'LEGS'

1. Cut a length of yarn 4 times the length of the leg.

4. Take the needle through the closed loop and pull the yarn to secure it to the edge.

2. Fold in half and thread the closed end through the eye of a thick needle.

5. Twirl the needle approximately x 30 to twist the thread, and then draw yarn out so that it becomes a braid, keeping enough straight thread in the needle with which to secure the end.

3. Sew the yarn through the fabric edge.

6. Sew the end into the fabric with 2 or 3 stitches.

7. Snip the ends of yarn close to the cloth..
