

# DATA SERVICE FOR COMPLEX 3D DATA IN THE ARTS AND HUMANITIES

+  
Dr. Karina Rodriguez Echavarria  
University of Brighton

Arts and  
Humanities  
Research Council

**University of Brighton**

Centre for Secure, Intelligent  
and Usable Systems

# Tour de table

# Introduction

- + AHRC scoping research project to specify a data service within the *national infrastructure for digital innovation and curation for arts and humanities (iDAH)*.
- + Focus on **large-scale, multi-part and complex visual/spatial datasets.**
- + February 2022 – July 2022

# Collaborations

- + University of Brighton
- + King's College London, (KCL)/  
King's Digital Lab
- + University College London
- + University of the West of  
England
- + Duke University, US
- + Cambridge Digital Humanities
- + Duncan of Jordanstone College  
of Art & Design (DJCAD),  
University of Dundee
- + Historic Environment Scotland
- + IIF-3D Community Group
- + Mnemoscene
- + The British Library
- + The National Archives
- + The University of Edinburgh
- + Victoria and Albert Museum

# 3D Data in the Arts and Humanities

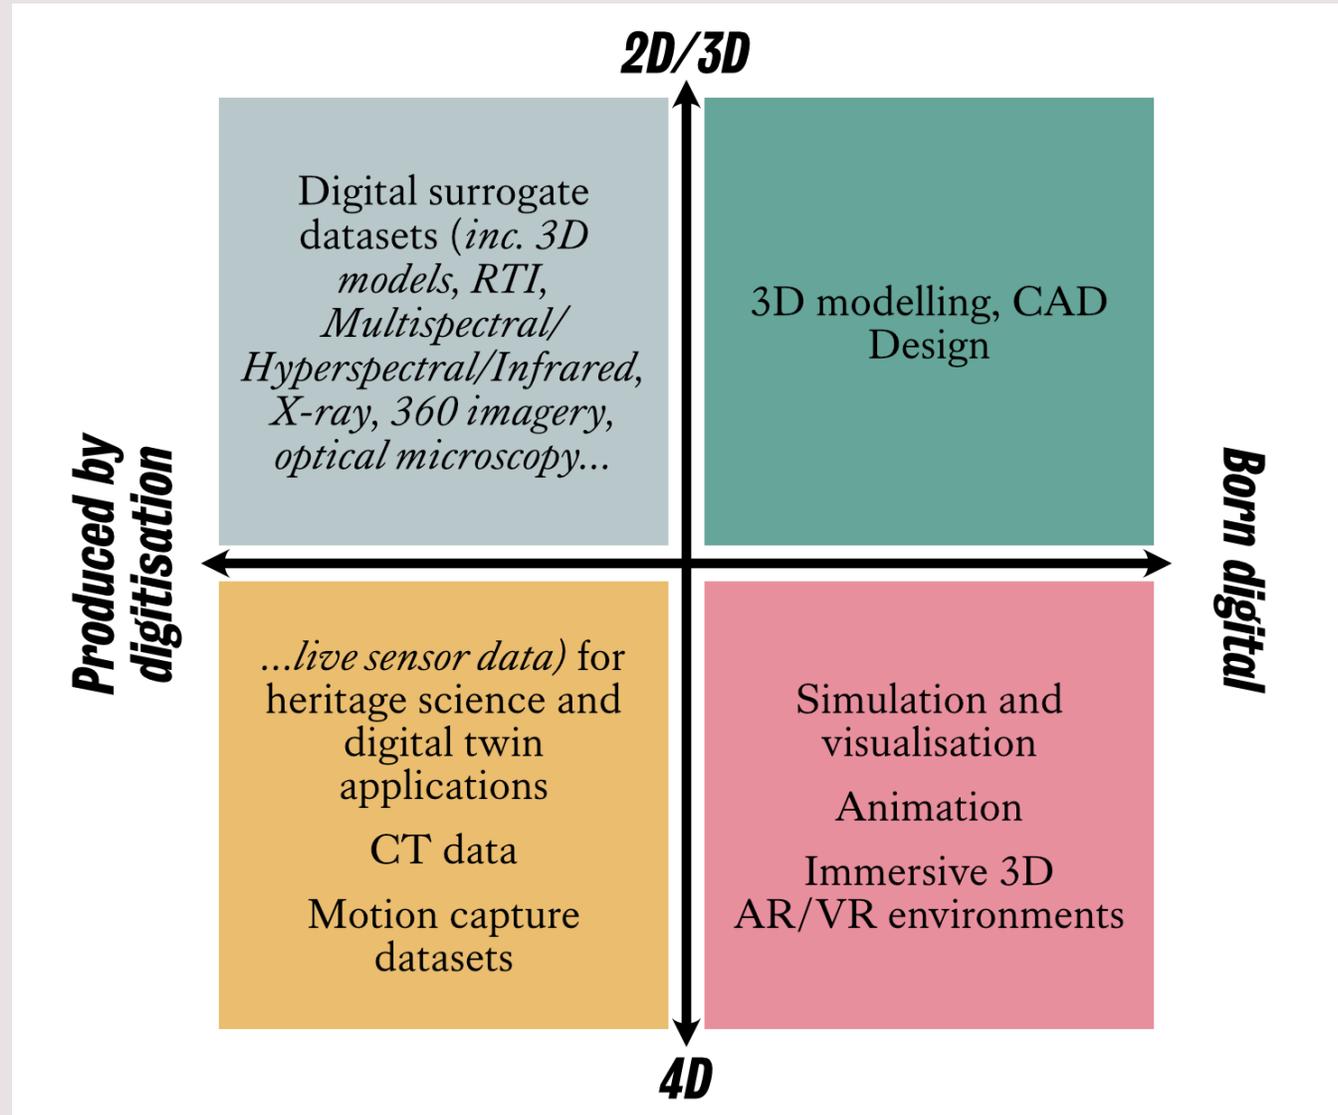

- + Include primary data and digital resources created in the course of research on:
  - + cultural collections and archives within the GLAM sector, including their interpretation and preservation, as well as,
  - + other creative research practices within disciplines such as the visual arts, design, media, and performance.

# 3D Data in the Arts and Humanities

- + Large multi-part, and multi-format datasets.
- + They describe the creation process, as in:
  - + the various steps involved in the digitisation of an artefact into a 3D model, or
  - + the project files for an immersive environment or a simulation.
- + We refer to this content as ***complex multidimensional data***.

# Complex multidimensional data

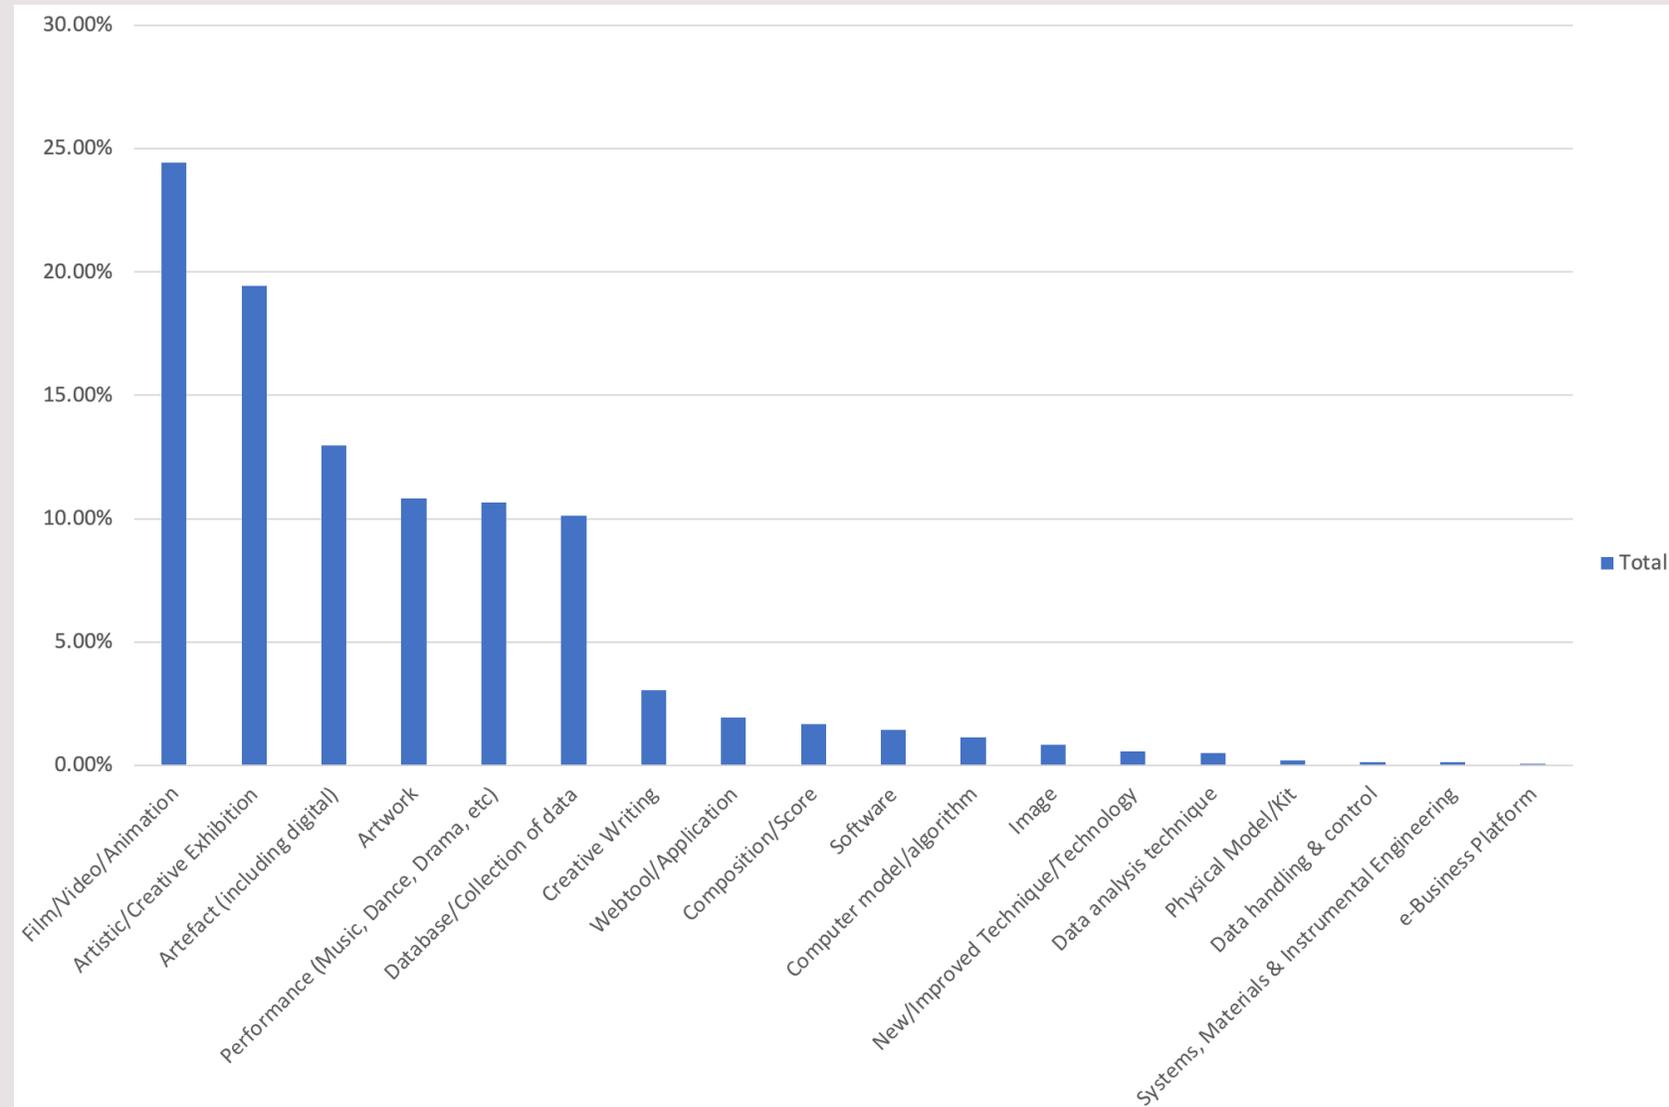

# Needs

1. Lack of services to support Arts and Humanities (A&H) researchers using complex 3D data, inc. **3D, spatio-temporal, imaging outputs, and analytical data for research.**
2. Data remains inaccessible, not reusable for further research, and remains underexploited as a resource.

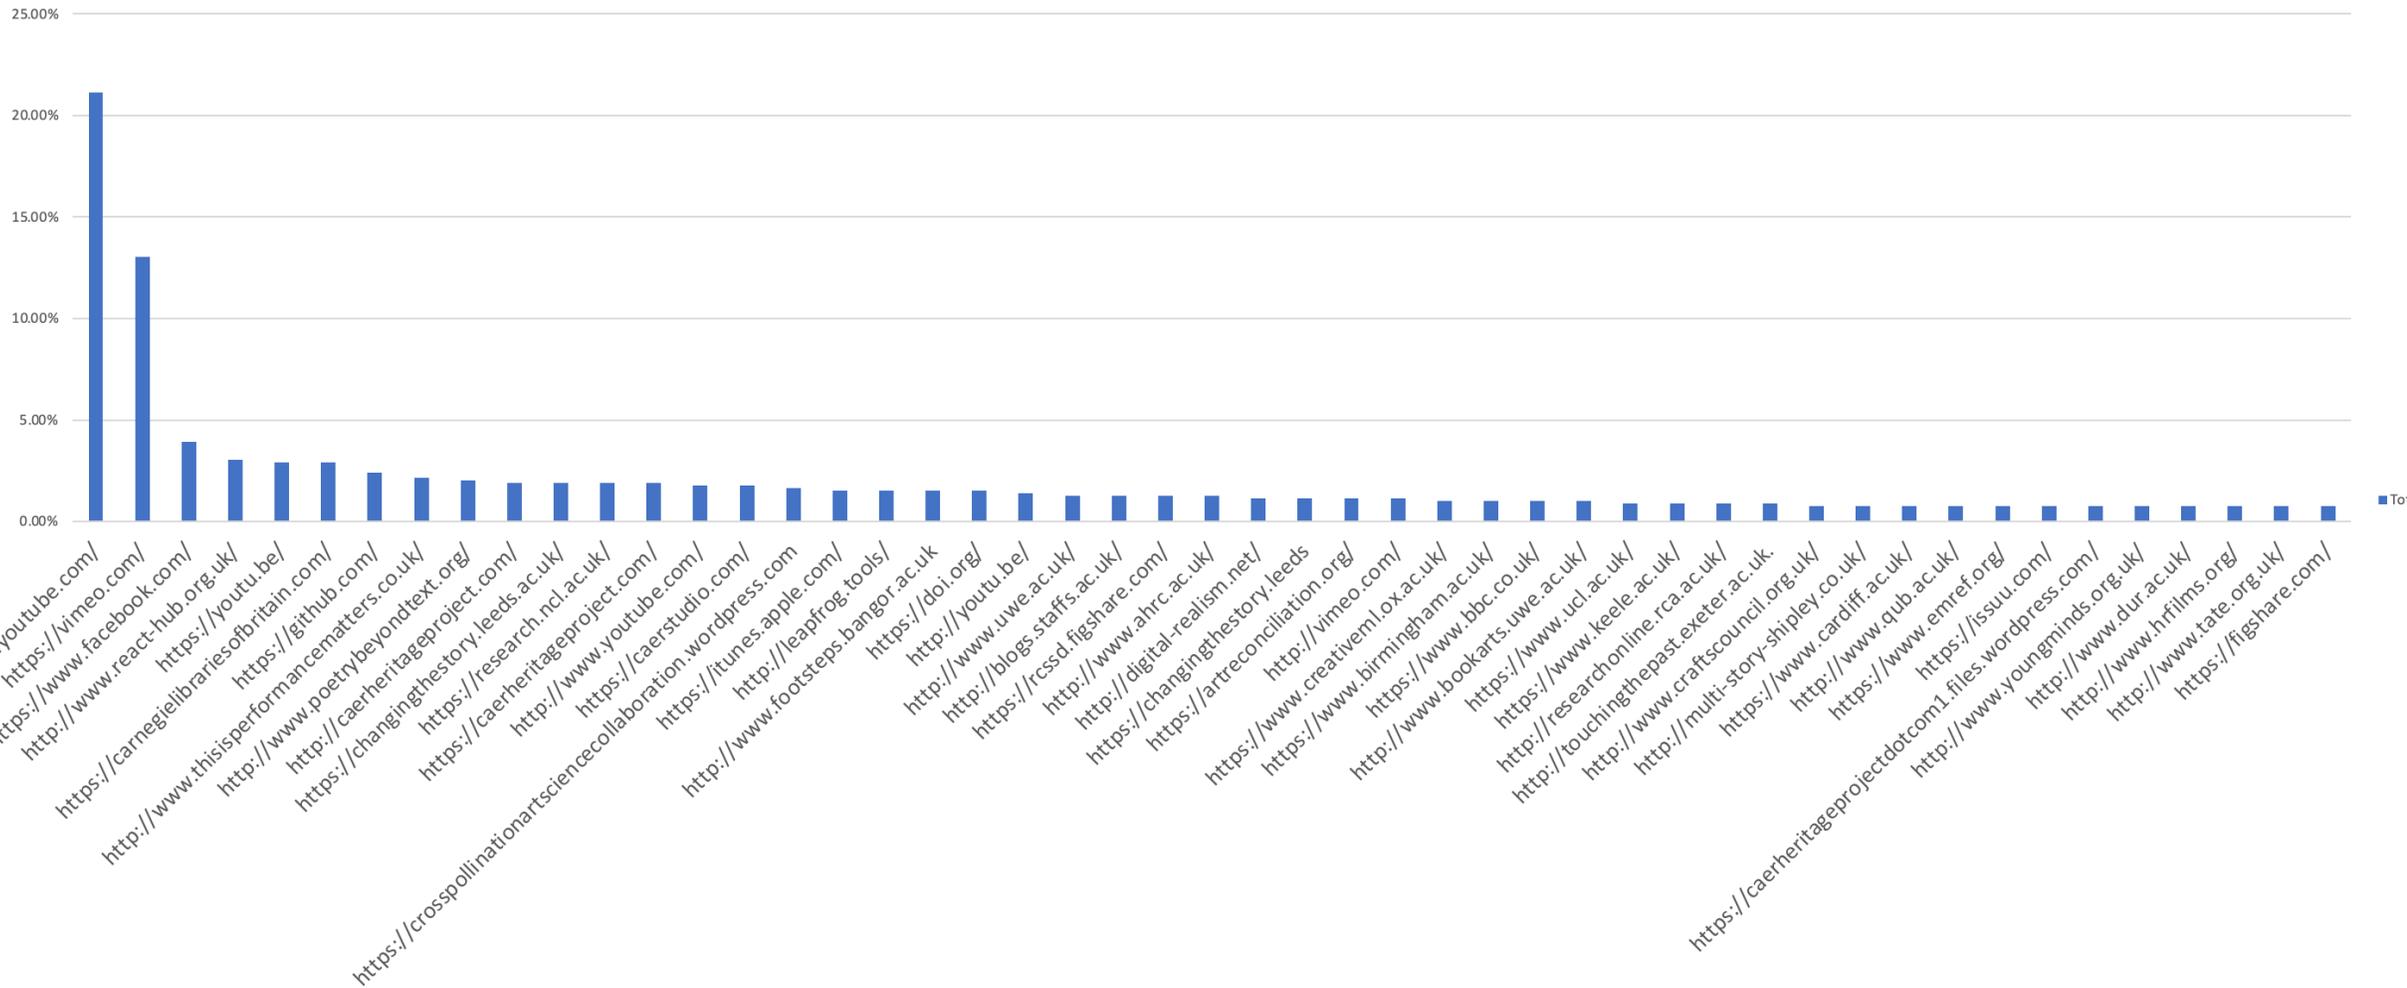

# Survey related projects

- + Our initial research harvested ~10,000 AHRC funded projects' on **UKRI gateway**.
- + Looked for relevant keywords, in project description, impact and outputs, including 3D, RTI, imaging, digital twin, VR/AR immersive, 360, etc.
- + Classified their outputs by types.

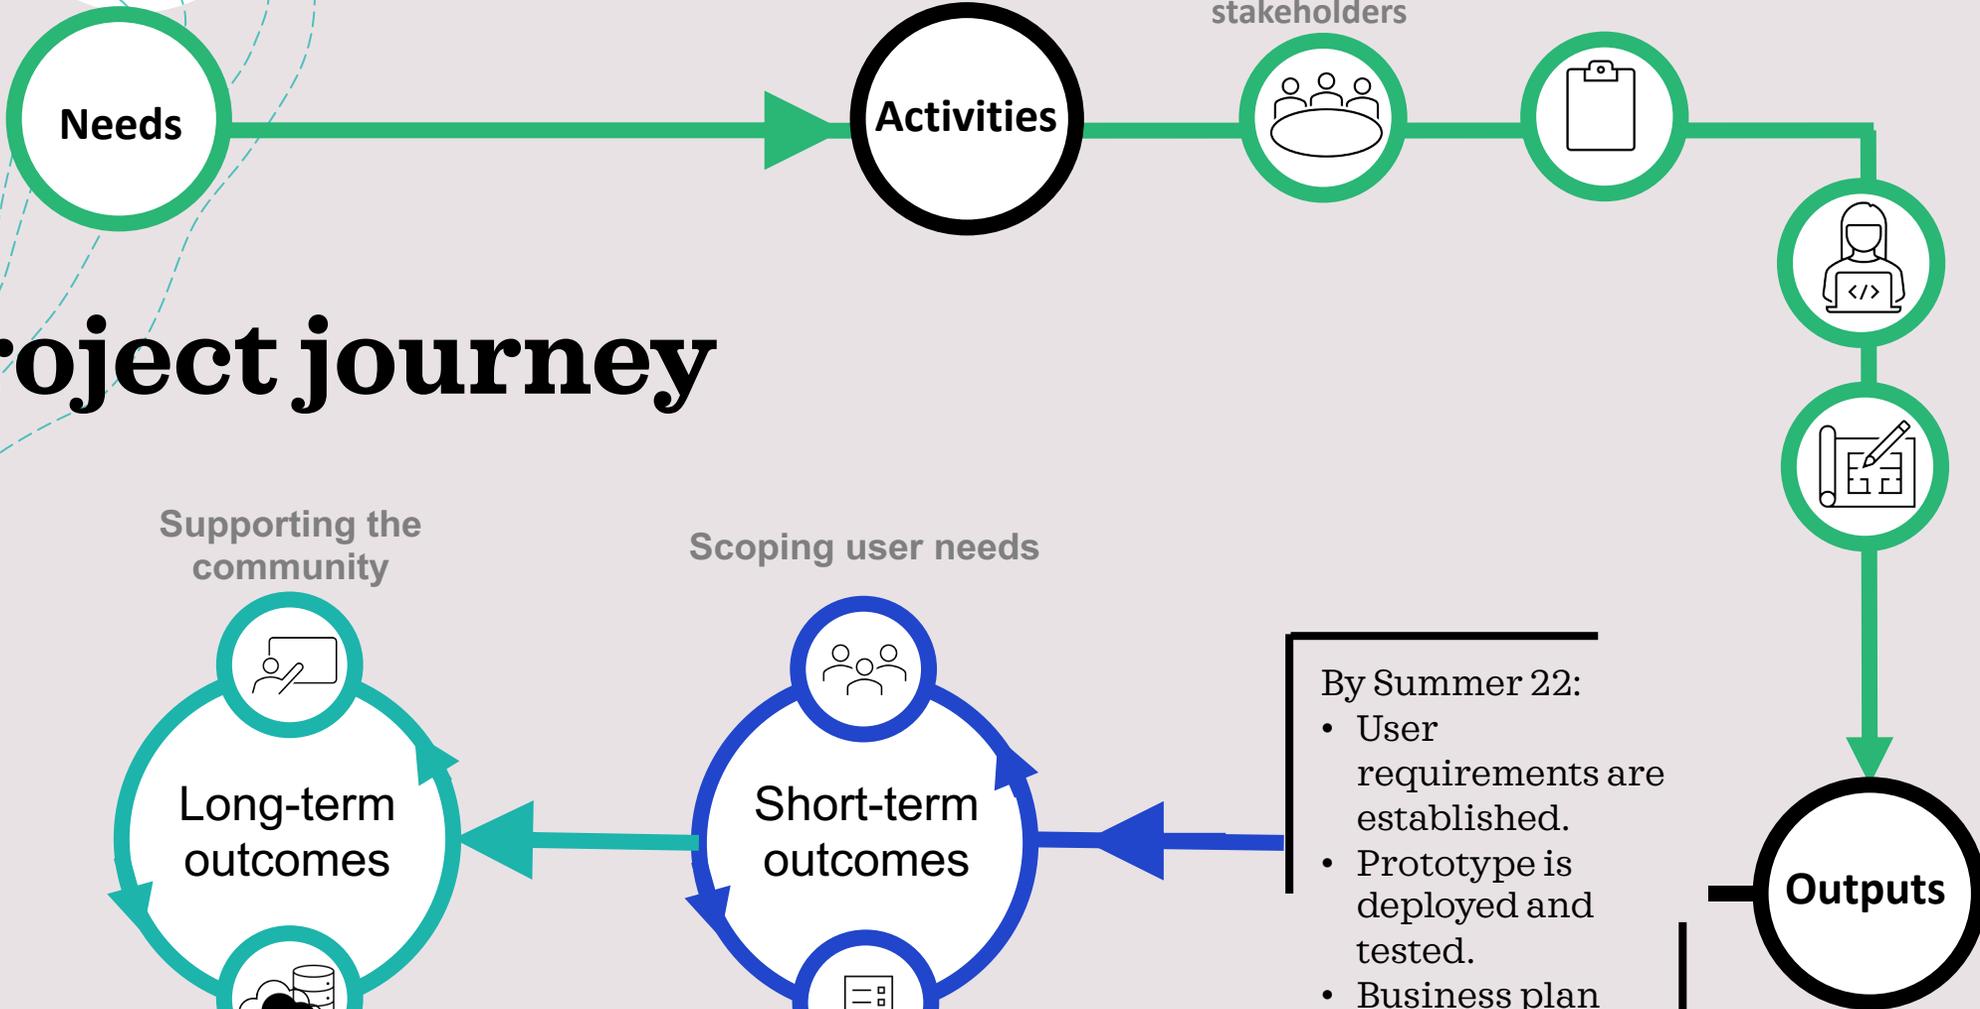

# Types of outputs

# Websites for accessible outputs

# Project journey

1. Workshops with stakeholders

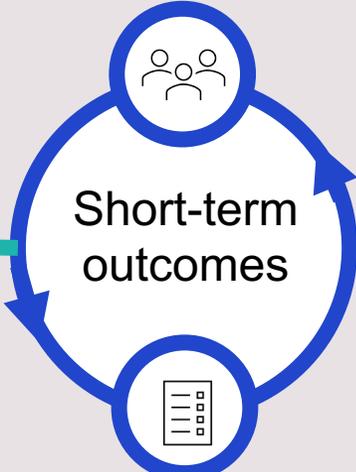

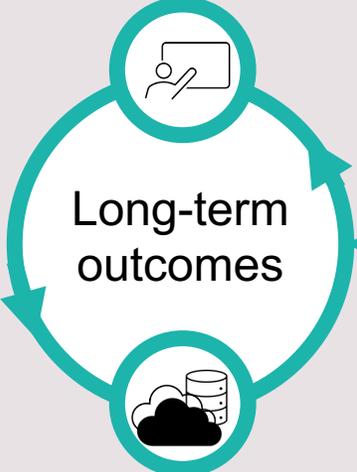

2. User survey

3. Prototype testing

4. Design and develop business plan and specification

Supporting the community

Scoping user needs

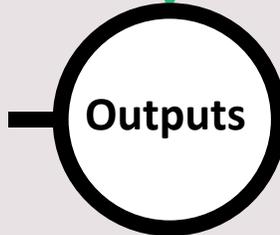

By Summer 22:

- User requirements are established.
- Prototype is deployed and tested.
- Business plan and full specification is available.

Creating and maintaining a data repository for complex 3D data

Developing a specification to guide implementation

# Core specifications for 3D data service

1. Make data compliant with the **FAIR principles** (Findable, Accessible, Interoperable and Re-usable).
2. Support open-data and **open-science practices**.
3. Provide **extended access** to the data (e.g. API interfaces).
4. Enable the data's long-term **preservation**.
5. **Support users** to produce, use and manage the data.

# Core specifications for 3D data service

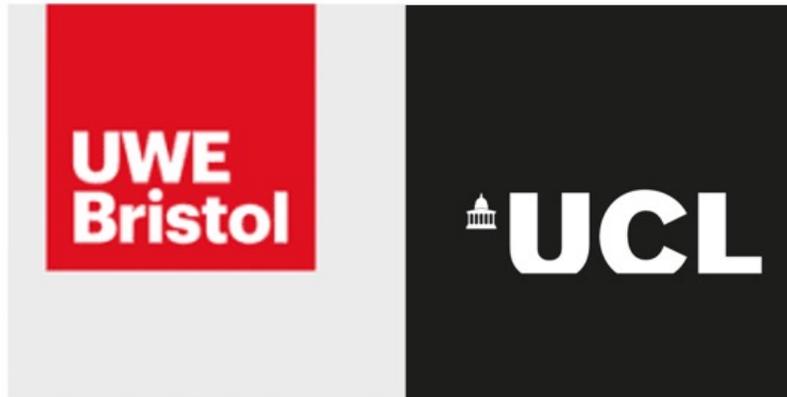

6. Enable new modalities for **publication and dissemination**.
7. Underpin new financial **sustainability models**.
8. Guarantee the **financial sustainability** of the data service.
9. **Innovate** in the development and provision of such data service.
10. **Integrate** with other data service to provide a unified infrastructure.

# Online user survey

- + To be launched in a couple of weeks.
- + The aim is to discover requirements from current and future users, in aspects such as:
  - + Nature of the data
  - + Size of data
  - + Storage/Access
  - + Copyright

# Workshop: gathering requirements

- + Looking at other national/European infrastructures.
  - + Overview of Morphosource which is the system we will test during the project.
- + Overview of various UK arts and humanities projects in relevant areas.
- + Round tables for gathering feedback.
