Diverse roles for occupational therapists is a compilation of a range of roles for occupational therapists. Authors show how they have embraced opportunities, extended roles, and developed services along with the ever-changing world of statutory services policy. Whilst many of the chapters allude to mental health fields (care coordination, a number of mental health specialities, Mental Health Act), the book also includes topics relevant to general practice (research roles, advanced practice, Assistive Technology, the Mental Capacity Act).

This book is intended to inform and inspire the reader, to share ways of dealing with hurdles whilst remaining resilient to prevailing pressures and difficulties borne out of our working lives as occupational therapists in a wide range of settings.

Contents include:

- ☐ Occupational therapists as care coordinators
- ☐ Occupational therapists and assertive outreach
