

How to record an audio narration over a powerpoint slideshow

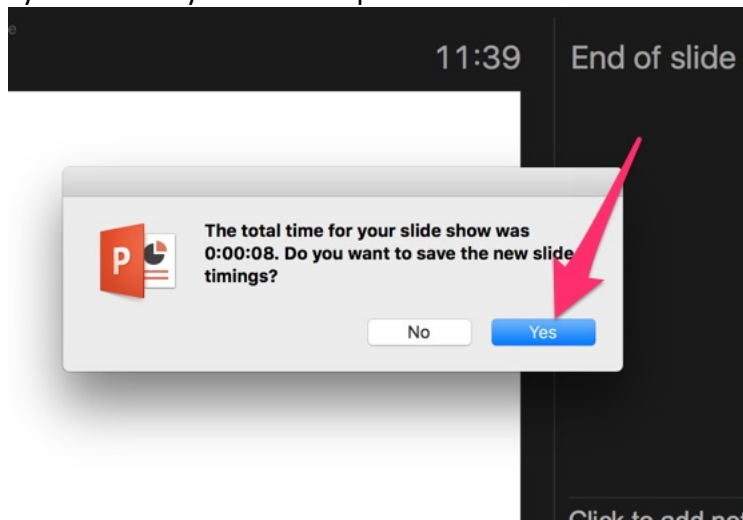

Open your powerpoint presentation on a computer with a microphone attached, or built in. Select "record slideshow" from the ribbon.

Advance your slides using the arrows, or normal keyboard shortcuts. If you have only one slide, to stop the recording press the PAUSE button.

At the end of your presentation you will be asked if you want to save the new timings, select "yes". Now if you save the presentation it will have the audio attached to the slides.

You can review your narration by selecting Slideshow>Play from start.
