

## Visiting the Oracle: An Immersive Experience

### 360° video viewing instructions

On a computer:

Follow the YouTube link to open the video, click and drag with a mouse on the video screen, or click the arrows in the top left corner.

We recommend using Firefox or Safari for a smoother playback. When possible, try and stream the video with the highest quality setting.

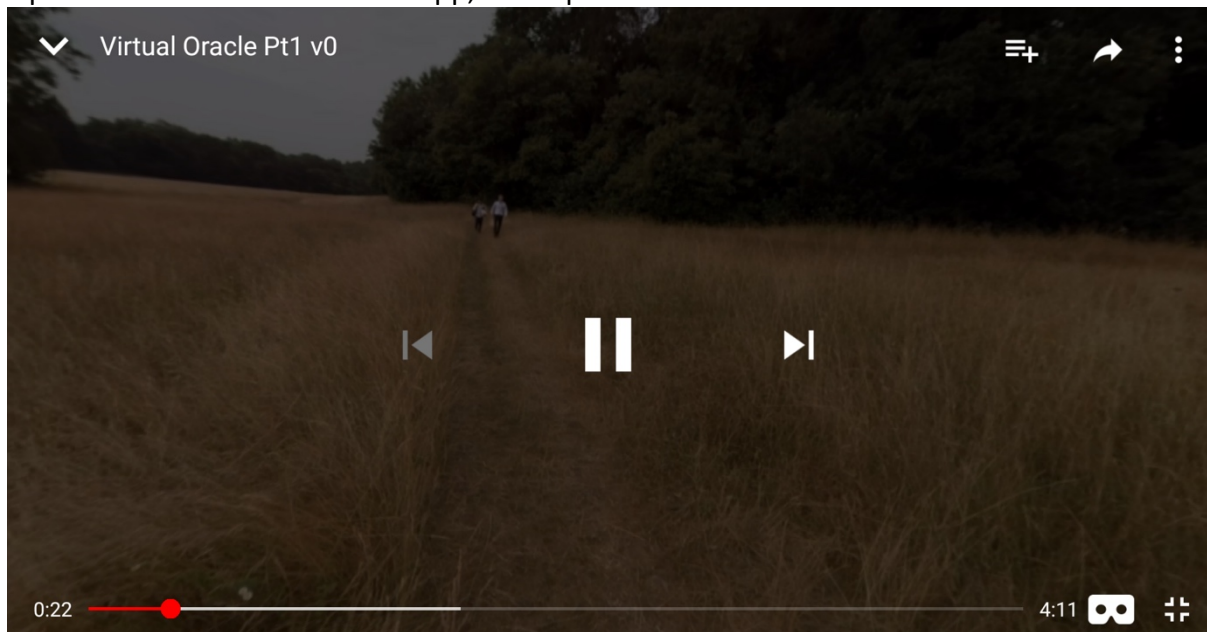

On a mobile device (smartphone or tablet):

Open the video in the YouTube app (which usually happens automatically when you play the video), then drag your finger across the screen or move your device around in different directions.

Using a VR headset such as Google Cardboard

Open the video in the YouTube app, and tap the cardboard icon  .

The screen will split into two smaller screens.

Insert your phone into the headset, and look around to view the video in 360°.
