

Apply

- Visit the 'Apply Now' page of the EPSRC CDT in Aerosol Science website where you can:
- Download a Word or PDF version of the application form to prepare your answers
- Complete application form by the deadlines listed

Shortlisting and PhD project preferences

- CDT team shortlist candidates for interview and contact applicants as soon as possible after each deadline
- Shortlisted candidates will be invited to select up to three projects of interest listed on the CDT projects page

Interview

- Candidates complete two 20-minute online assessments (A&B) with two members of the CDT academic team
- Assessment A (focus on technical skills and previous research background)
- Assessment B (suitability of the CDT training model for your learning style)
- Details and assessment criteria will be shared with candidates ahead of the assessments

Re-confirm your
PhD project
preferences

- Alongside assessments A&B, candidates have project-specific discussions with potential supervisors
- Following these discussions, candidates will be invited to re-confirm preferred PhD projects

Interview
outcomes

- The CDT will compile interviewer feedback and candidate preferences.
- The CDT will contact candidates to confirm whether we can offer you a studentship.

Receive offer

- To receive an official offer, the candidate applies via the official application system of the PhD host university. This enables the required document and reference checks, but no further interviews should be required.
