Children & Families Research Centre

An interdisciplinary research hub with a global focus, dedicated to developing new insights into the lives of children, young people, and their families. Its staff and doctoral researchers undertake a wide range of applied, conceptual, and theoretical work, drawing on strong relationships with civic society.

The Centre seeks both to understand the everyday experiences of children, young people, and families, and to improve outcomes for those who are vulnerable, including children in care and those who are adopted.

Grounded in a children's rights approach, the Centre employs a range of rigorous and innovative methods to conduct research that informs policy and practice at national and international levels.

Thanks to the Centre

for **conceptualising and running this event** and for their continued **leadership in advancing research on children and families**

THANK YOU

*With sincere appreciation for their tireless
work, behind the scenes, making this
inaugural conference possible.*
