

Update your Education to the correct Bayes Business School page

- 1) Login to LinkedIn, go to "me" => "view profile".
- 2) Scroll down to "Experience" and click on the pencil icon.
- 3) Select the relevant "experience" that is still linked to the Cass Business School page and click on the pencil icon.
- 4) A pop-up window will open, and you can modify your information.
- 5) Under "Company name", select "Bayes Business School". **But beware to select the right one!** There is an impostor site that mimics us (we are on their case). The correct site is <https://www.linkedin.com/school/bayes-business-school/>. You can recognise it because the logo has red lines above and below.
- 6) Please select the right Bayes Business School and then click save.

Voila, you have successfully updated your profile! Please also check if Cass still appears anywhere else on your profile (e.g., in your education or in your main description right after your name) and if yes, change it to Bayes Business School (formerly Cass).
