

# Citizen Science Image Collection

## Wheat, Oilseed Rape, & Barley

1. Choose a size reference (an object of known size, e.g. 20p or 50p British coin, ruler, or tape measure).
2. Choose a spot in your field that is at least 10 meters from the gate or field edge.
3. Place your size reference on the ground, as visible as possible from above.
4. Take a big step back from the spot where you placed your size reference.
5. Take the image from directly above at just above waist height, keeping the camera level.
6. Retake the photo if the image misses the size reference, is blurry, or includes your shadow.

*Examples of size references (above) and image capture (below)*

7. Upload your photos [here](#) and answer a few simple questions.

*QR code instructions:* open your phone's camera and point it at the code to the left. Open the link that pops up.

*Full image (above) and focused image (below)*

## Garden Crops & Brambles

1. Choose a specific fruit, vegetable, or flower.
2. Take 1 photo positioned approximately 1m from the crop (full image).
3. Take 1 photo of the same crop so that the fruit, vegetable, or flower fills the screen (focused image).
4. Retake the photos if the image is blurry or includes your shadow.
5. Upload your photos [here](#) and answer a few simple questions.

*QR code instructions:* open your phone's camera and point it at the code to the right. Open the link that pops up.

**Thank you for your help!**
