

Bounce Guqin (A spiritual techno performance)

As an inheritor of the Chuan-style Guqin (川派古琴传人), Qiqi has combined her research on "binaural beats" with recordings of Guqin's single tones at various frequencies, creating a special "buzzing" sound frequency that induces relaxation.

In her original composition "**Bounce Guqin**," Qiqi integrates Guqin melodies and rhythms into a cheerful tempo, enhanced with effects. This work represents an unprecedented breakthrough in the traditional Guqin by exploring various creative forms.

Building on these elements, Qiqi merges the Minimal Techno music style with meditation, creating a meditation space specifically designed for young people. Here, you can lie down, relax, and even fall asleep. 😴

Keywords: Techno, Guqin, relaxing
